WORK EXPERIENCE

Sunpay Technology — Delhi
Front-end Developer — *January* 2024-Current
- I designed the multiple pages of frontend.
- Calling Api and send data to the show in tabular form of data.
- Manage navigation with API responses.
- Make Frontend responsive for all type of devices.

PROJECTS

News Website — **Github**
- Developed a responsive News web application using HTML, CSS and JavaScript.
- Integrated with a News API to Fetch and display real-time news articles.
- Implement a card-based layout for intuitive presentation of news content.
- Incorporated search functionality enabling users to filter news articles based on keywords or topics.

Movie Detail Website | IMDB Clone — **Github**
- Developed a movie app clone of IMDB featuring popular, top-rated, and upcoming movies using react.
- Designed a user-friendly interface with a card theme to display movie information.
- Leveraged APIs to fetch and display real-time movie data for an updated and dynamic user experience.
- Enhance user experience by incorporating transition for displaying movies one by one on the home page in larger size.

JavaScript Basic Project
- Countdown timer
- Responsive Navbar
- Background color changer
- To-Do app
